Brian Wenig

EGTS Program Vice President
Honeywell Aerospace

Brian Wenig is Vice President, Business Development, Air Transport & Regional at Honeywell Aerospace. In this role he leads Honeywell's efforts to establish a Joint Venture with Safran including supporting the business and development of the Electric Taxi Product.

Brian's tenure with Honeywell began as a production engineer for the propulsion product line, transitioning engines from development to production. Since then, Brian held a series of positions of increasing leadership responsibility in quality, customer support and program management. He has led development and customer support activities on a wide range of products ranging from APUs, mechanical components, propulsion engines and avionics. Brian was most recently the Regional Vice President for Honeywell Airlines Business responsible for North and South America. In this capacity, Brian was responsible for leading customer

account management, sales strategy and execution, overall aftermarket business performance and profit and loss for the Americas region. Prior to this role Brian was the platform director on the Airbus customer business team, responsible for managing products and services on the Airbus A320/A330/A340 aircraft. In this capacity, Brian managed executive relationships, on-time product development and quality assurance and developed new processes to manage repairs, modifications and upgrades to Airbus platforms.

Brian has a bachelor's degree in mechanical engineering and his master's degree in business administration, both from Arizona State University in Tempe, Arizona.
